For the 4 models of household and commercial ozone anti-bacterial deodorizer "OZONEO" available in the market, Maxell, Ltd. (hereafter referred to as "Maxell") has obtained the certification of "Epidemic prevention products and other recommended products" from Japan Society of Disaster Prevention and Safety (general corporate body).

"Certification system of epidemic prevention products" is aimed at companies engaging in manufacturing epidemic prevention products. The system strictly controls virus infectious diseases as infectious disasters, reviews the safety and effectiveness of products and services that prevent such infections, and the mark of "Epidemic prevention products and other recommended products" will be granted for products which meet adaptive standards. Before obtaining the certification, in the field of epidemic prevention, based on the guidelines for safety, security and effective use of environmental health, professional person will conduct audit and review from the standpoint of public health. Upon audit and review, products that meet the security and safety standards will obtain the certification.
